

## **Planning Committee Recommendations**

**May 2020**

### Applications

**S/01/327/LB at Gawthrop Bridge, Gawthrop, Dent** - listed building consent for repair works to the arch barrel, soffit and abutments and to introduce drainage measures to shed water away from the parapets

On examining this application it became apparent that the noted diversion was along the Occupational Road which is totally inadequate.

Whilst the committee wished to approve this application so that the bridge can be repaired, another diversion route needs to be worked out.

Recommend to object to the application based on the diversion route.

### Decisions

**None**
