

# Dent Parish Council Sub-Committee Recommendation

**Committee**            **Car Park**

**Date**                    **27 July 2020**

## **Purpose of the Report**

To enable the Parish Council to make a decision regarding the installation of Electric Vehicle Charge points.

## **Recommendation**

Option 2 – Allow the installation of 2 x 22Kw charge points and associated equipment by Charge My Street

## **Context**

The Car Park Committee has recently been looking at a project to make improvements to the car park and toilets following the refurbishment of the inside of the toilets. EV Charge points were one such improvement.

## **Alignment to Dent Parish Council Objectives**

Aligns with Objective 2 - Promoting Tourism and The Dale and Objective 3 - Improve Health and Wellbeing and the Environment of the Dale

## **Background**

The Car Park Committee had been in talks with YDNPA to provide charging facilities in the car park through their partner Pod Point. This was likely to cost in the region of £5000. The Clerk had been invited to a webinar on EV charging and had attended, where he learnt about Charge My Street and invited them to look at the car park as a potential install site.

## **Options Considered**

1. Wait and allow Pod Point or another commercial enterprise to install EV charging at a cost of up to £5000.
2. Allow Charge My Street to install EV charging at not current cost to the council.

## **Financial Implications**

None – The cost of install of the first 2 x 22Kw chargers will be met by Charge My Street.

## **Conclusion**

To recommend to council that Charge My Street are allowed to install as above.

**Ian Mitchell**

**Chair of the Car Park Committee**
