DENT PARISH COUNCIL RISK ASSESSMENT 2020-2021

Dear Councillors,

The Council is expected to carry out an annual risk assessment of financial risks it is exposed to and identify any actions it considers necessary to minimise those risks.

Definition of Risk Management

Risk is the threat that an event or action will adversely affect an organisation's ability to achieve its objectives and to successfully execute its strategies. Risk management is the process by which risks are identified, evaluated and controlled. It is a key element of the framework of governance together with community focus, structures & processes, standards of conduct and service delivery arrangements. ***Audit Commission – Worth the Risk: Improving Risk Management in Local Government (2001:5).***

This document has been produced to enable the Parish Council to assess the risks that it faces and satisfy itself that it has taken adequate steps to minimise them. The Council is aware that although some risks can never be eliminated fully, it has in place a strategy that provides a structured, systematic and focused approach to managing risk.

The following table shows general risks that the Parish Council considered upon review at the Parish Council meeting of 04 May 2020.

Subject: Identifies the subject area (column 1)

Risks Identified: Identification of what the risk may be (column 2)

Risk Score: Identification of the level of risk - high, medium or low (column 3)

Management / Risk Control: Evaluates the management and control of risk and records findings (column 4)

Review/Assess/Revise: Reviews, assesses and revises procedures and responsibilities as required (column 5)

This Risk Assessment was formally reviewed and accepted by the Parish Council on Monday 04 May 2020.
